

**AIG GLOBAL EQUITIES VALUE FUND (the "Sub-Fund")
a sub-fund of AIG GLOBAL FUNDS (the "Fund")**

**SIMPLIFIED PROSPECTUS
Dated 27 March, 2009**

This Simplified Prospectus contains key information relating to the Sub-Fund, which is a sub-fund of the Fund. The Fund is an open-ended umbrella unit trust established and authorised in Ireland as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2003 (S.I. No. 211 of 2003), as amended, authorised on 4 March, 2005 by the Financial Regulator. As at the date of this Simplified Prospectus, the Fund is comprised of the following sub-funds:

- | | |

Potential investors are advised to read the Prospectus for the Fund, dated 27 March, 2009 and the relevant Supplement for the Sub-Fund, dated 27 March, 2009 (the "Prospectus") before making an investment decision. The rights and duties of the investor as well as their legal relationship with the Fund and the Sub-Fund are outlined in the Prospectus. Defined terms used herein will have the same meaning as set out in the Prospectus.

The Base Currency of the Sub-Fund is US Dollars.

Investment Objective:	The investment objective of the Sub-Fund is to achieve long-term capital appreciation by investing primarily in global equity securities of issuers whose equity market capitalisations exceed US\$1 billion at the time of purchase. At least two thirds of the investments of the Sub-Fund will be in such equity securities.
Investment Policy:	<p>The Sub-Fund is not subject to any specific geographic diversification requirements and shall invest on a worldwide basis. Countries in which the Sub-Fund may invest include, but are not limited to, the United States and the nations of Western Europe, North and South America, Australia, Africa and Asia.</p> <p>The Investment Managers approach in selecting investments for the Sub-Fund is oriented to individual stock selection and is value driven as described below.</p> <p>No more than 20% of the total value of the Sub-Fund's assets, measured at the time of purchase, may be invested in securities of companies located in emerging markets throughout the world.</p> <p>The Investment Managers approach in selecting investments for the Sub-Fund is oriented toward individual stock selection and is value driven. The Investment is committed to the use of the "Graham and Dodd" style value investing approach as introduced in the classic book "Security Analysis". Using this philosophy, the Investment Manager views stocks as small pieces of businesses which are for sale. They seek to purchase a diversified group of these businesses as stocks whose current prices are believed to be considerably below their intrinsic values, the Investment Manager believes they can secure not only a possible margin of safety against price declines, but also an attractive opportunity for profit over the business cycle.</p>

In analysing a company's true long-term value, the Investment Managers focus is on fundamental characteristics of a company, including, but not limited to, book value, cash flow, earnings and capital structure, as well as management records and broad industry issues. Once the intrinsic value of a company is estimated, this value is compared to the current price of the stock. If the price is substantially lower than the intrinsic value, the stock may be purchased.

The Investment Manager believes that the margin between the current price and the intrinsic value of a company's stock should provide a margin of safety against price declines. In addition, over a business cycle of three to five years, the Investment Manager believes that the market should begin to recognise the company's value and drive its price up toward its intrinsic value. Although the Sub-Fund will not invest in equities for short-term trading purposes, such securities may be sold from time to time without regard to the length of time such securities have been held.

The Sub-Fund may, within the limits laid down by IFSRA, invest in equity and equity-related securities including but not limited to common stock, preferred stock and securities which are convertible into or exchangeable for such equity securities, or which carry warrants to purchase such equity securities.

The Sub-Fund may, within the limits laid down by IFSRA, purchase and sell equity index and equity-related instruments including but not limited to LEPO's, OPALS, PERLES (as outlined in the main body of the Prospectus), participatory receipts / participatory certificates and share index notes, each of which may assist in achieving the investment objective of the Sub-Fund. Where utilised, LEPO's, OPALS and PERLES will be listed or traded on one or more of the stock exchanges or recognised markets on which the Sub-Fund is permitted to invest, as set out in Appendix II to the Prospectus. These instruments shall in each case comprise transferable securities of the issuer, notwithstanding that their value is linked to an underlying equity or equity index. In practice, the Sub-Fund will purchase such instruments from an issuer and the instrument will track the underlying equity or equity index. It should be noted that the Sub-Fund's exposure in relation to these instruments will be to the issuer of the instruments. However, the Sub-Fund will also have an economic exposure to the underlying securities themselves. Any LEPO's purchased or sold by the Sub-Fund will be exercisable at any time over the duration of its life and may be settled on a cash basis.

The Sub-Fund may invest in American, International, and Global Depository Receipts (ADR's / IDR's / GDR's) which are listed on a Recognised Exchange as set out in Appendix II to the Prospectus. Such investments must be in accordance with the investment objective, investment policy and investment restrictions of the Sub-Fund.

The Sub-Fund may invest up to 10% of its Net Asset Value in regulated collective investment schemes, including real estate investment trusts (REITS), where the investment policies of these schemes are consistent with that of the Sub-Fund and such schemes meet the criteria set out in Guidance Note 2/03. The ability to trade REITS in the secondary market can be more limited than other stocks.

The Sub-Fund may, within the limits laid down by IFSRA, hold cash and/or ancillary liquid assets and may invest in money market instruments (as defined in IFSRA's Notices and which may or may not be dealt on a regulated market), which are rated investment grade by an international rating agency. Such money market instruments may include but are not limited to non-government short term obligations (such as fixed or floating rate commercial paper), obligations of banks or other depository institutions (such as certificates of deposit and bankers acceptances), securities issued or otherwise backed by supranational organisations or by sovereign governments, their agencies, their instrumentalities and political sub divisions.

The Sub-Fund may, within the limits laid down by IFSRA, hold deposits with credit institutions as prescribed in IFSRA's Notices.

The performance of the Sub-Fund's portfolio of investments will be measured against MSCI World Daily Total Return Net Index (the "Index"). The Index is a free float-adjusted market capitalization index that is designed to measure global developed market equity performance. The Investment Manager may consider that, where the Sub-Fund's portfolio make up is different to that of the Index, it is necessary or desirable to replicate the currency exposure of the Index and therefore the Investment Manager is entitled to alter the currency exposure characteristics of certain of the assets held within the Sub-Fund through the use of forward and futures currency contracts so that, whilst its own determination of portfolio make up may be reflected in the actual portfolio make up, the currency exposure can reflect that of the Index.

The Investment Manager is, however, entitled at any time to change the Index where, for reasons outside the Investment Manager's control, the Index has been replaced by another index or where another index may reasonably be considered by the Investment Manager to have become the industry standard for the relevant exposure. Unitholders will be advised of any change in the Index in the next annual or half-yearly report of the Sub-Fund.

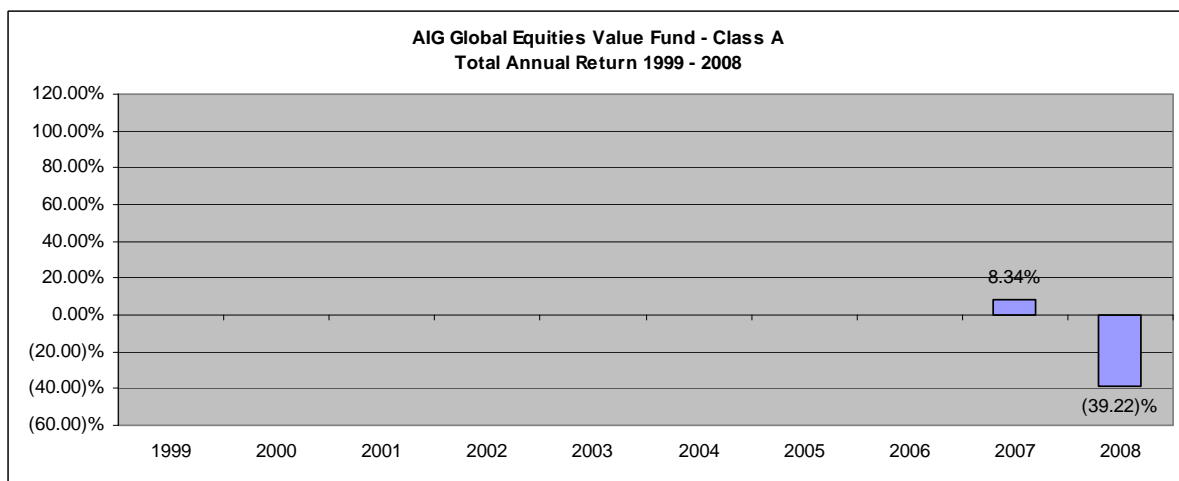

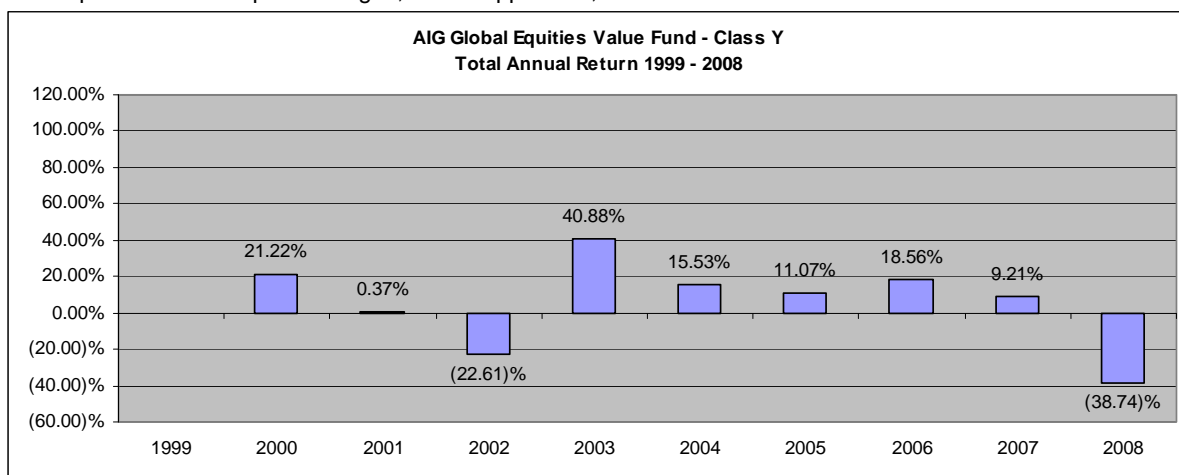

The Sub-Fund may also engage in forward foreign exchange contracts for hedging purposes, to alter the currency exposure of the underlying assets, in accordance with the limits set out by IFSRA. The Sub-Fund may also hedge currency exchange risk by entering into forward, futures and currency swap contracts and purchasing and selling put or call options on foreign currency and on foreign currency futures contracts within the limits set out by IFSRA. Because currency positions held by the Sub-Fund may not correspond with the asset position held, the

	<p>performance may be strongly influenced by movements in the FX exchange rates.</p> <p>The Sub-Fund will not be leveraged as a result of engaging in forward foreign exchange contracts, forward, futures and swap currency contracts, call options on foreign currency or foreign currency futures contracts.</p> <p>Any changes to the investment objective of the Sub-Fund and any material changes to the investment policy may not be made without the prior written approval on the basis of a majority of votes cast at a general meeting of Unitholders of the Sub-Fund. Any such changes may not be made without the approval of IFSRA. In the event of a change in investment objective and/or a change to the investment policy, a reasonable notification period will be provided by the Manager to enable Unitholders redeem their Units prior to implementation of such change.</p> <p>The Sub-Fund will be managed so as to be fully invested, other than during periods where the Investment Manager believes that a larger cash position is warranted.</p> <p>The Sub-Fund's investments are subject to the investment restrictions as set out in the section headed "Investment Restrictions".</p> <p>No assurance can be given that the Sub-Fund's investment objective will be achieved.</p> <p>The Manager will, on request, provide supplementary information to Unitholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the investments.</p> <p>It is not the current intention of the Sub-Fund to use financial derivative instruments for investment purposes. Should this intention change the Prospectus and this Supplement shall be amended accordingly.</p> <p>A list of the stock exchanges and markets in which the Sub-Fund is permitted to invest, in accordance with the requirements of IFSRA, is contained in Appendix II to the Prospectus and should be read in conjunction with, and subject to, the Sub-Fund's investment objective and investment policy, as detailed above. IFSRA does not issue a list of approved markets. With the exception of permitted investments in unlisted securities, investment will be restricted to those stock exchanges and markets listed in Appendix II to the Prospectus.</p> <p>The risk factors specific to the Sub-Fund are set out in section 5 below and includes Emerging Markets Risk and Volatility Risk. These risk factors may not be a complete list of all risk factors associated with an investment in the Sub-Fund.</p>
Risk Profile:	<p>Potential investors should be aware that the value of Units in the Sub-Fund can fall as well as rise. An investor may receive back less than his/her investment.</p> <p>Please consult the Prospectus under the heading "Risk Factors" together with the relevant supplement for the Sub-Fund for a more detailed analysis of the risk profile of the Sub-Fund. Principal risk factors outlined in the Prospectus are; Accounting Standards Risk, Co-Management of Assets, Counterparty Risk, Counterparty Default: Absence of Regulation, Credit Risk, Currency Risk, Derivative, Techniques and Instruments Risk, Emerging Markets Risk, Exchange Rate Risk, Global Financial Market Crisis and Governmental Intervention, Interest Rate Risk, Investing in Fixed Income Securities, Investment Return, Legal Infrastructure, Liquidity Risk, Market Disruptions, Market Risk, Non-Convertibility of Currency, Political and/or Regulatory Risks, Redemption Risk, Redemption Restrictions, Registration Risk, Reliability of Credit Ratings, Reliability of Information, Remittance of Principal and Investment Income, Settlement Risk, Stocklending Risk, Sub-Custody Risk, Suspension of Dealing, Unit Currency Designation Risk and Valuation Risk.</p> <p>Additional Sub-Fund Risk Factors include: Emerging Markets Risk and Volatility Risk.</p>

Performance Data:

Details of the past performance of the Sub-Fund are set out below.

Subscription and redemption charges, where applicable, are not included in this data.

Annualised Performance as at 31 December 2008

	Class Y	Class L	Class A
Past 3 Years:	(7.43)%	(7.66)%	N/A
Past 5 Years:	0.35%	0.10%	N/A
Past 10 Years:	N/A	N/A	N/A

Please note that past performance is no guarantee of future returns. The value of units and the income from them may fluctuate.

Profile of a Typical Investor:

Investment in the Sub-Fund is suitable only for those persons and institutions for whom such investment does not represent a complete investment program, who understand the degree of risk involved and believe that the investment is suitable based upon investment objectives and financial needs.

Distribution Policy:	<p>In relation to Class YD, Class Y1D and Class Y3D Units, the Manager intends to declare a distribution on the last Business Day of May and November of each year. Distributions shall generally be declared out of the net income (whether in the form of dividends, interest or otherwise) available for distribution by the Sub-Fund and the realised profits less realised losses and unrealised profits less unrealised losses.</p> <p>In respect of all other Unit Classes of the Sub-Fund the Manager may declare a distribution once a year out of the net income (whether in the form of dividends, interest or otherwise) available for distribution by the Sub-Fund and the realised profits less realised losses and unrealised profits less unrealised losses. The Manager may also declare interim distributions on the same basis. Annual distributions (if declared) will be declared and paid on or before 30 June in each year.</p>
