

**AIG GLOBAL BOND FUND (the "Sub-Fund")  
a sub-fund of AIG GLOBAL FUNDS (the "Fund")**

**SIMPLIFIED PROSPECTUS  
Dated 27 March, 2009**

This Simplified Prospectus contains key information relating to the Sub-Fund, which is a sub-fund of the Fund. The Fund is an open-ended umbrella unit trust established and authorised in Ireland as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2003 (S.I. No. 211 of 2003), as amended, authorised on 4 March, 2005 by the Financial Regulator. As at the date of this Simplified Prospectus, the Fund is comprised of the following sub-funds:

|---|--|

Potential investors are advised to read the Prospectus for the Fund, dated 27 March, 2009 and the relevant Supplement for the Sub-Fund, dated 27 March, 2009 (the "Prospectus") before making an investment decision. The rights and duties of the investor as well as their legal relationship with the Fund and the Sub-Fund are outlined in the Prospectus. Defined terms used herein will have the same meaning as set out in the Prospectus.

The Base Currency of the Sub-Fund is US Dollars.

<b>Investment Objective:</b>	The Sub-Fund seeks a high level of return from a combination of current income and capital appreciation by investing in a portfolio of debt securities denominated in US Dollars and a range of other currencies including, Euro, Australian Dollar, New Zealand Dollar, Canadian Dollar, Swiss Franc, Danish Krone, Swedish Krona, Norwegian Krone, British Sterling, Japanese Yen, Polish Zloty, Hungarian Forint, South African Rand, Singapore Dollar, Slovak Koruna and Mexican Peso.
<b>Investment Policy:</b>	<p>The Sub-Fund will invest not less than two-thirds of the Sub-Fund's total assets in bond issues allocated across global markets. Of its total assets the Sub-Fund may invest one-third in money market instruments such as time deposits, convertible bonds, or fixed or floating rate commercial paper, 25% in convertibles and bonds with warrants attached and 10% in equity and equity-related securities (excluding convertibles and bonds with warrants attached), provided that these investments in aggregate do not exceed one-third of the Sub-Fund's total assets.</p> <p>The Sub-Fund is actively managed with due consideration given to short term market trends and their potential effects on intermediate results. The majority of the Sub-Fund is invested in investment grade, sovereign, supranational and corporate bond issues of fixed and/or floating rate with a rating of no less than BBB- as rated by Standard and Poor's, or equivalent by Moody's or other rating agency. Where no rating is available, the Manager, with the advice of the Investment Manager, may assign its own rating which must be the equivalent or BBB- or better as rated by Standard and Poor's, or equivalent by Moody's or other rating agency. During the course of an investment cycle, the majority of the Sub-Fund's investments will normally be between three and ten years but it may invest in maturities outside this range.</p> <p>The Sub-Fund's investments will be allocated across global markets.</p>

The majority of the Sub-Fund's investments will be in the countries contained in the Citigroup World Government Bond (Unhedged) Index (the "Index").

The performance of the Sub-Fund's portfolio of investments will be measured against the Index. The Index is a market capitalisation weighted index that, as of March 2005, tracked the performance of the government bond markets of Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hungary, Ireland, Italy, Japan, The Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, the United Kingdom, the United States and Greece. The Investment Manager may consider that, where the Sub-Fund's portfolio make up is different to that of the referenced Index, it is necessary or desirable to replicate the currency exposure of the Index and therefore the Investment Manager is entitled to alter the currency exposure characteristics of certain of the assets held within the Sub-Fund through the use of forward and futures currency contracts so that, whilst its own determination of portfolio make up may be reflected in the actual portfolio make up, the currency exposure can reflect that of the Index.

The Investment Manager is, however, entitled at any time to change the Index where, for reasons outside the Investment Manager's control, the Index has been replaced by another index or where another index may reasonably be considered by the Investment Manager to have become the industry standard for the relevant exposure. Unitholders will be advised of any change in the Index in the next annual or half-yearly report of the Sub-Fund.

The Sub-Fund may invest up to 10% of its Net Asset Value in regulated collective investment schemes, including real estate investment trusts (REITS), where the investment policies of these schemes are consistent with that of the Sub-Fund and such schemes meet the criteria set out in Guidance Note 2/03. The ability to trade REITS in the secondary market can be more limited than other stocks.

The Sub-Fund may, within the limits laid down by IFSRA, hold cash and/or ancillary liquid assets and may invest in money market instruments (as defined in IFSRA's Notices and which may or may not be dealt on a regulated market), which are rated investment grade by an international rating agency. Such money market instruments may include but are not limited to non-government short term obligations (such as fixed or floating rate commercial paper), obligations of banks or other depository institutions (such as certificates of deposit and bankers acceptances), securities issued or otherwise backed by supranational organisations or by sovereign governments, their agencies, their instrumentalities and political sub divisions.

The Sub-Fund may, within the limits laid down by IFSRA, hold deposits with credit institutions as prescribed in IFSRA's Notices.

Where considered appropriate, the Sub-Fund may utilise collateralised debt obligations ("CDO"), credit default swaps ("CDS"), or credit linked notes ("CLN") for investment purposes or for hedging purposes, including protection against credit or default risks, subject to the conditions and within the limits laid down by IFSRA. Such investments must be in accordance with the investment objectives, investment policy and investment restrictions of the Sub-Fund.

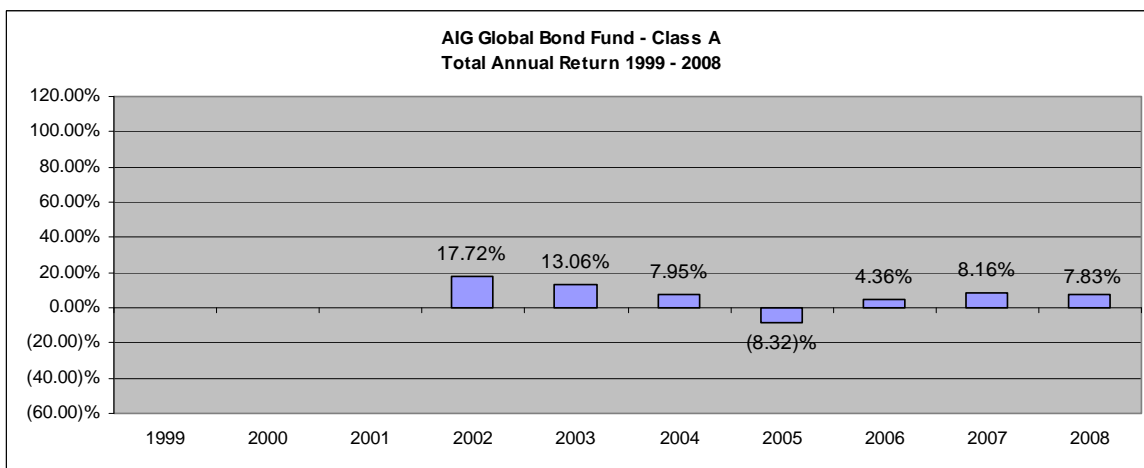

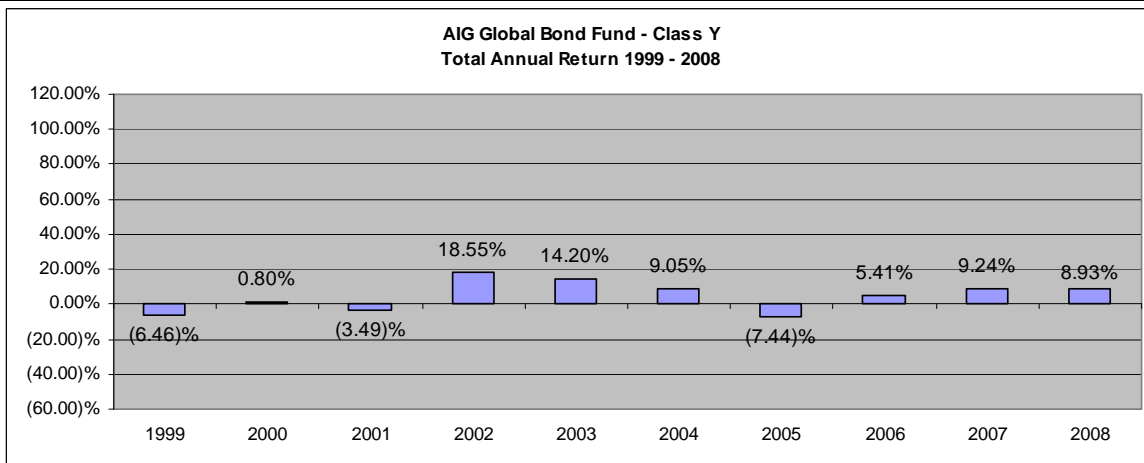

A CDO is a security backed by a pool of bonds, loans and other assets. CDOs do not specialize in one type of debt and accordingly, a CDO may own corporate bonds, commercial loans, asset-backed securities, residential mortgage-backed securities, commercial mortgage-backed securities, and emerging market debt. The CDO's securities are typically divided into several classes, or bond tranches, that have differing levels of investment grade or credit tolerances. Most CDO issues are structured in a way that enables the senior bond classes and mezzanine classes to receive investment-grade credit ratings; credit risk is shifted to the most junior class of securities. If any defaults occur in the assets backing a CDO, the senior bond classes are first in line to receive principal and interest payments, followed by the mezzanine classes and finally by the lowest rated (or non-rated) class, which is known as the equity tranche. The Sub-Fund will invest in the rated or equity tranches of CDO's and will not be leveraged as result of such investments.

A CDS is a financial derivative instrument which operates to mitigate credit risk. The protection buyer purchases protection from the protection seller for losses that might be incurred as a result of a default or other credit event in relation to an underlying security. The protection buyer pays a premium for the protection and the protection seller agrees to make a payment to compensate the protection buyer for losses incurred upon the occurrence of any one of a number of possible specified credit events, as set out in the CDS agreement. In relation to the use of CDS's the Sub-Fund may be a protection buyer and/or a protection seller.

A CLN is a security that pays a fixed or floating coupon during the life of the note (the coupon is linked to the performance of a reference asset, typically bonds) and which allows the issuer to transfer a specific credit risk to an investor. At maturity, the investor receives the par value of the underlying security unless the referenced credit defaults or declares bankruptcy, in which case the investor receives an amount equal to the recovery rate.

The Sub-Fund may also engage in forward foreign exchange contracts, including non-deliverable forwards, for investment purposes or for hedging purposes, to alter the currency exposure of the underlying assets, in accordance with the limits set out by IFSRA. The Sub-Fund may also hedge currency exchange risk by

	<p>entering into forward, futures and currency swap contracts and purchasing and selling put or call options on foreign currency and on foreign currency futures contracts within the limits set out by IFSRA. Because currency positions held by the Sub-Fund may not correspond with the asset position held, the performance may be strongly influenced by movements in the FX exchange rates.</p> <p>The Sub-Fund may for investment purposes or for hedging purposes purchase and write call and put options on securities (including straddles), securities indices and currencies and enter into equity and bond index futures contracts and use options on such futures contracts (including straddles).</p> <p>The use of derivatives may create an exposure risk, however, any exposure arising as a result of the use of derivatives will not exceed the Net Asset Value of the Sub-Fund (i.e. the Sub-Fund will not be leveraged in excess of 100% of its net assets).</p> <p>The Manager will employ a risk management process which will enable it to monitor and measure the risks attached to financial derivative positions and details of this process have been provided to IFSRA. The Manager will not utilise financial derivatives which have not been included in the risk management process until such time as a revised risk management process has been reviewed by IFSRA.</p> <p>The Manager will, on request, provide supplementary information to Unitholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the investments.</p> <p>Any changes to the investment objective of the Sub-Fund and any material changes to the investment policy may not be made without the prior written approval on the basis of a majority of votes cast at a general meeting of Unitholders of the Sub-Fund. Any such changes may not be made without the approval of IFSRA. In the event of a change in investment objective and/or a change to the investment policy, a reasonable notification period will be provided by the Manager to enable Unitholders redeem their Units prior to implementation of such change.</p> <p>The Sub-Fund will be managed so as to be fully invested, other than during periods where the Investment Manager believes that a larger cash position is warranted.</p> <p>The Sub-Fund's investments are subject to the investment restrictions as set out in the section headed "Investment Restrictions".</p> <p>No assurance can be given that the Sub-Fund's investment objective will be achieved.</p> <p>A list of the stock exchanges and markets in which the Sub-Fund is permitted to invest, in accordance with the requirements of IFSRA, is contained in Appendix II to the Prospectus and should be read in conjunction with, and subject to, the Sub-Fund's investment objective and investment policy, as detailed above. IFSRA does not issue a list of approved markets. With the exception of permitted investments in unlisted securities, investment will be restricted to those stock exchanges and markets listed in Appendix II to the Prospectus.</p> <p>The risk factors specific to the Sub-Fund are set out in section 6 below and include Financial Derivative Instruments, Fixed Income Securities, Credit Default Swaps, Money Market Instrument Risk and Volatility Risk. These risk factors may not be a complete list of all risk factors associated with an investment in the Sub-Fund.</p>
<b>Risk Profile:</b>	<p><b>Potential investors should be aware that the value of Units in the Sub-Fund can fall as well as rise. An investor may receive back less than his/her investment.</b></p> <p>Please consult the Prospectus under the heading "Risk Factors" together with the relevant supplement for the Sub-Fund for a more detailed analysis of the risk profile of the Sub-Fund. Principal risk factors outlined in the Prospectus are; Accounting Standards Risk, Co-Management of Assets, Counterparty Risk, Counterparty Default: Absence of Regulation, Credit Risk, Currency Risk, Derivative, Techniques and Instruments Risk, Emerging Markets Risk, Exchange Rate Risk, Global Financial Market Crisis and Governmental Intervention, Interest Rate Risk, Investing in Fixed Income Securities, Investment Return, Legal Infrastructure, Liquidity Risk, Market Disruptions, Market Risk, Non-Convertibility of Currency, Political and/or Regulatory Risks, Redemption Risk, Redemption Restrictions, Registration Risk, Reliability of Credit Ratings, Reliability of Information, Remittance of Principal and Investment Income, Settlement Risk, Stocklending Risk, Sub-Custody Risk, Suspension of Dealing, Unit Currency Designation Risk and Valuation Risk.</p> <p>Additional Sub-Fund Risk Factors include: Financial Derivative Instruments, Fixed Income Securities, Credit Default Swaps, Money Market Instrument Risk and Volatility Risk.</p>
<b>Performance Data:</b>	<p>Details of the past performance of the Sub-Fund are set out below.</p> <p>Subscription and redemption charges, where applicable, are not included in this data.</p>

Annualised Performance as at 31 December 2008

	Y Class	A Class
Past 3 Years:	7.85%	6.77%
Past 5 Years:	4.83%	3.79%
Past 10 Years:	4.55%	N/A

**Please note that past performance is no guarantee of future returns. The value of units and the income from them may fluctuate.**

<b>Profile of a Typical Investor:</b>	Investment in the Sub-Fund is suitable only for those persons and institutions for whom such investment does not represent a complete investment program, who understand the degree of risk involved and believe that the investment is suitable based upon investment objectives and financial needs.																												
<b>Distribution Policy:</b>	<p>In relation to Class JD, J3D, YD, Y1D and Y3D Units, the Manager intends to declare a distribution on the last Business Day of February and August of each year. Distributions shall generally be declared out of the net income (whether in the form of dividends, interest or otherwise) available for distribution by the Sub-Fund and the realised profits less realised losses and unrealised profits less unrealised losses.</p> <p>In respect of all other Unit Classes of the Sub-Fund the Manager may declare a distribution once a year out of the net income (whether in the form of dividends, interest or otherwise) available for distribution by the Sub-Fund and the realised profits less realised losses and unrealised profits less unrealised losses. The Manager may also declare interim distributions on the same basis. Annual distributions (if declared) will be declared and paid on or before 30 June in each year.</p>
